---

## Summary

- Founder and technology leader with **7+ years of experience** designing, developing, deploying, and scaling **AI/ML solutions and software products** across diverse domains. Strong expertise in **NLP, Computer Vision, Data Science, AI Agent, OCR**. Hands-on experience with **Python, JavaScript, FastAPI, Nodejs, AWS and Docker** combined with a strong foundation in end-to-end software development, system architecture, and production deployment.

## Technical Skills

- **Leadership:** Technical Leadership, Team Management, Mentoring, Project Planning, Solution Architecture
- **Programming:** Python, JavaScript, TypeScript, SQL, PHP
- **AI/ML:** Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Transformers, Computer Vision, RAG, AI Agents
- **Frameworks:** PyTorch, TensorFlow, Keras, Hugging Face, Scikit-learn, FastAPI, Django, Flask
- **Data & Databases:** Pandas, PySpark, SQL, PostgreSQL, MySQL, MongoDB, Elasticsearch, Vector Databases
- **Cloud & MLOps:** AWS, Docker, Kubernetes, CI/CD, MLflow, DVC, Airflow, Model Deployment & Monitoring
- **Backend & Architecture:** REST APIs, Microservices, System Design, API Design, OAuth, JWT, Scalable Architecture
- **Development:** Git, GitHub, Linux, Testing, Debugging, Performance Optimization, Production Deployment

---

## Experience | 7+ Years

**Founder** | Eyvy Solutions, Dubai, UAE | April 2025 - Present

- **Project Name:** [Zayrro](#): Travel Booking Platform
- **Technical Skills:** PERN, AWS, OpenAI
- **Key Achievements:**
  - Developed travel-booking workflows covering **flights, hotels, attractions, and supporting travel services**.
  - Integrated and orchestrated multiple travel suppliers including **Amadeus, Akbar Travels, Benzy, and Rayna Tours**.
  - Developed workflows covering flight search, availability, itinerary creation, seat selection, booking, confirmation, and retrieval.
  - Built provider-specific integration and normalization logic to handle different supplier APIs and response structures.
  - Worked on payment, wallet, cancellation, and booking-amount workflows.
  - Debugged and resolved complex supplier API issues involving authentication, booking references, itinerary creation, and provider-specific errors.
- **Project Name:** [Adsmith](#): AI-Powered Advertising Platform
- **Technical Skills:** Docker, PERN, Supabase, OpenAI, Gemini
- **Key Achievements:**
  - Engineered multi-model Generative AI video workflows using LTX-2, Veo 3.1, and Sora 2 Pro, with asynchronous job tracking, status polling, failure handling, and production-state management.
  - Built AI creative experimentation and advertising workflows integrating creative generation, Meta and Google campaign deployment, performance measurement, and iterative optimization.
  - Developed cross-platform location intelligence using Google Ads and Meta location IDs, canonical normalization, geocoding fallback, and Supabase Edge Functions for AI and advertising automation.
- **Project Name:** [StrategyWorks](#): Enterprise Strategy & Portfolio Management
- **Technical Skills:** Docker, Angular, PHP, AWS, Runway
- **Key Achievements:**
  - Developed interconnected workflows across strategic objectives, OKRs/KPIs, portfolios, programmes, projects, and milestones.
  - Implemented enterprise workflows for risks, issues, decisions, dependencies, ownership, and financial tracking.

- Designed and implemented complex enterprise data models for strategic planning, project execution, and management reporting.
- Translated complex business requirements into scalable application workflows and technical implementations.
- Implemented subscription management, role-based access control, and permission management.
- Developed organization-level database backup and restore functionality.
- **Project Name:** [Rocketsites AI](#): AI Website Builder
- **Technical Skills:** Python | AI Agents | GLM | Local AI
- **Key Achievements:**
  - Built a Python-based AI agent for an AI-powered website builder capable of generating and developing websites from user requirements.
  - Integrated the GLM API for AI-based website generation and development.
  - Built and integrated a smaller local AI subagent working alongside the GLM API for website-development tasks.
  - Designed AI-agent workflows combining local AI processing with cloud LLM capabilities.
  - Integrated AI website generation with a drag-and-drop/manual website builder, enabling users to build websites through both AI and traditional visual editing.
  - Worked on AI-assisted workflows for translating user requirements into website structure and development actions.

#### Machine Learning Engineer | Ilaj Services, Dubai, UAE | June 2024 - April 2025

- **Project Name:** [Lazim](#): Comprehensive Owner Association Management Solution
- **Technical Skills:** Python (FastAPI), AWS (EC2), Docker, MLflow, TensorFlow, HuggingFace Transformer, Groq, SparkNlp
- **Key Achievements:**
  - Led the design and development of Python/Flask applications on AWS, improving processing speed by 20% and delivering scalable software solutions.
  - Developed AI-driven accounting, OCR, and ERP automation solutions, achieving 95% document extraction accuracy and reducing manual effort by 15%.
  - Built and optimized GPU-based OCR and document processing pipelines, along with predictive analytics and data visualization tools for data-driven decision-making.
  - Led remote teams, managed project delivery and resource allocation, and collaborated with stakeholders on requirements, scope, technical complexity, and team mentoring.

#### Data Scientist | Datamatics, Bangalore, India | January 2022 - June 2024

- **Project:** [IDFC Bank LOS System](#)
- **Technical Skills:** Python, Django, Numpy, Pandas, Elastic Search, AWS, Machine Learning, Data Science, Pyspark
- **Key Achievements:**
  - Automated loan approval, disbursement, collection, and lead management workflows for Micro Business, Home, and Education Loans, reducing processing time by 30%.
  - Developed predictive ML models for lead distribution, prioritization, matching, and conversion, improving lead conversion rates by 10%.
  - Built NLP, sentiment analysis, time-series, and recommendation models for support tickets, debt collection, payment reminders, and personalized LMS training.
  - Designed and deployed scalable ML APIs and integrations with Salesforce CRM, enabling real-time loan status updates and seamless business workflows.
  - Developed secure data and document processing solutions, including E-Stamp feature extraction and Aadhaar-based digital authentication, ensuring regulatory compliance.

#### Software Developer | Ecloud Solutions, Jaipur, India | May 2019 - January 2022

- **Project:** [RealmTalks](#)
- **Technical Skills:** .Net, Node js, AWS, Postgresql, Docker, ArgoDb
- **Key Achievements:**
  - Built RealmTalks, a social media app like Instagram using **microservices architecture**.
  - Set up an end-to-end system with micro services for posts, chat, reels, auth, story, and wallet.
  - Used **RabbitMQ** for event-driven communication.
  - Implemented **AI-based suggestions** for posts and reels.
  - Optimized media (photos/videos) for faster loading.
  - Developed chat module with:
    - **Live video streaming** (up to 10 users on 8-core server)
    - **Group video calls** using **MediaSoup + WebRTC**
    - Full real-time chat features.

- [AARM Health](#): Developed ReactJS front-end, implemented authentication, and enhanced user experience.
  - [Restodish](#): Developed Django back-end, created custom widgets, integrated restaurant functionalities.
- 

## Education

- **Bachelor** | Rajasthan University, 2019

## Languages

- Hindi, English

## Certifications

-  [Accelerated Computer Science Fundamentals](#)
-  [Mathematics For Machine Learning: Linear Algebra](#)
-  [Data Science](#)
-  [Deep Learning Specialization](#)
-  [Multivariate Calculus](#)
-  [Data Visualization](#)
